

Spring Class of 2014 How They Found Employment

How graduates find employment varies a great deal by degree and major. The data below show that there is no single method that works well for all job seekers. Some will find employment primarily through the services of their college career centers, while others will do so primarily through their own efforts or through third-party services. Interviews, internships, career fairs and other recruiting events, personal and professional referrals and traditional job postings are all potential paths to employment after graduation, so job seekers should take advantage of every resource and service available to them.

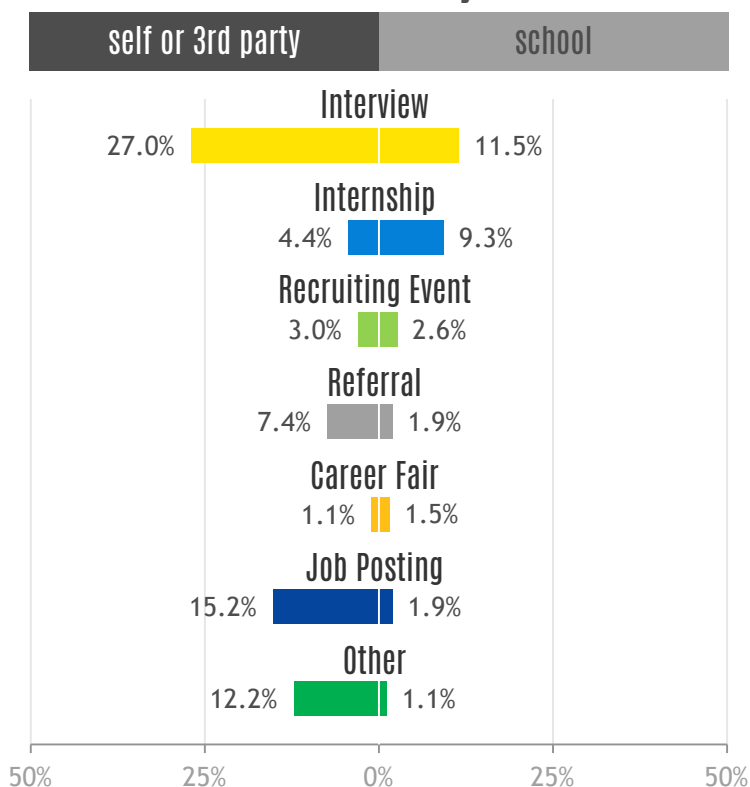

Bachelors (n=3,496)

Facilitated by:

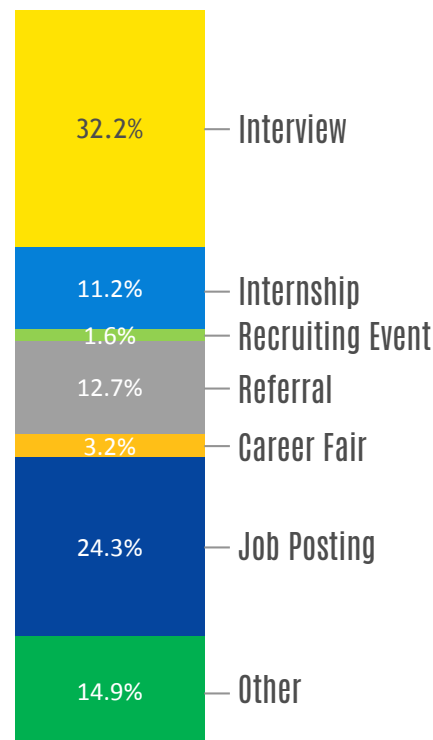

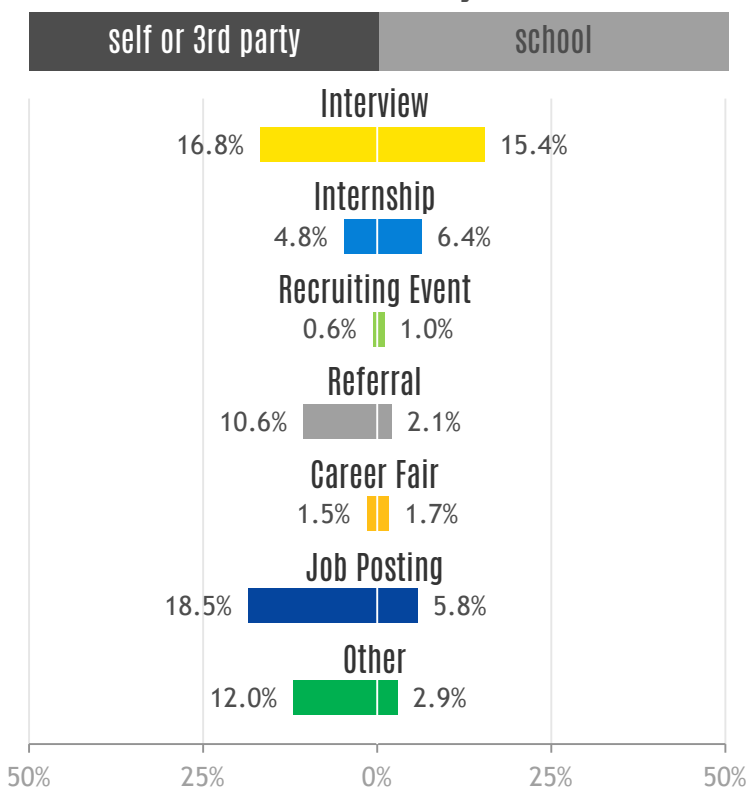

Associates/Certificate (n=270)

Facilitated by:

Masters (n=482)

Facilitated by:

Doctoral/Professional (n=131)

The information contained in these graphics is intended as a demonstration of the data collected by The Outcomes Survey (TOS). This infographic includes data on TOS respondents in the current Spring 2014 cohort collected during the period starting one month prior to graduation up to the period ending six months post-graduation. This infographic only includes data from those institutions following the "Gold" data collection standards prescribed by TOS. For more information on TOS standards, research methodology and data collection approach, please visit www.TheOutcomesSurvey.com/DataStandards.
